

Measurement Solutions,
Global Leader.

ATEQ - 1 INTERNATIONAL GROUP 3 BUSINESS ACTIVITIES

For more than 45 years, ATEQ has followed a core value established by our founder, Jacques Mouchet : "Take care of our teams and customers."

This enduring value guides us as we face the difficult challenge of responding to the corona virus (COVID-19), declared as a pandemic on Wednesday by the World Health Organization.

ATEQ is closely monitoring the World Health Organization (WHO) and local health agencies for the latest developments related to the corona virus (COVID-19), as well as following the guidance of government and public health officials.

While some employees in Europe and US will be working from home through the end of March, others are back in office in Asia; we adapt to local circumstances in order to preserve services to all our partners and take care of our employees.

All our production sites are currently operational.

We have halted all non-essential domestic and international travel and have instructed our employees to follow the public health authorities guidance with regards to preventive measures.

Employees are always available through email and personal cellphones.

We encourage all operators to take caution before and after using any kind of tool, machine or instrument. Remember to disinfect before and after use.

We appreciate the trust that you place in ATEQ. We will continue to closely monitor the situation and take actions necessary to help keep our employees and customers safe while providing the products and services you need.

We recognize that these are unsettling times, we want you to know that your safety and wellbeing is our utmost priority.

Sincerely,

ATEQ Group
